DETAILED ACTION

Specification

1. The abstract of the disclosure is objected to because of the grammar in lines 5-12. Correction is required. See MPEP § 608.01(b).
2. The disclosure is objected to because of the following informalities: on page 1, line 9, "handls" should be changed to --handles--; page 2, line 27, "on" should be --one--; page 3, line 6, "abut" should be --abutted--.

Appropriate correction is required.

Claim Objections

3. Claims 2,4 are objected to because of the following informalities: in claim 2, line 32, "said driving hole" should be --said driving tube--; in claim 4, line 3, "aid" should be --said--. Appropriate correction is required.

Claim Rejections - 35 USC § 102

4. The following is a quotation of the appropriate paragraphs of 35 U.S.C. 102 that form the basis for the rejections under this section made in this Office action:

A person shall be entitled to a patent unless –

(b) the invention was patented or described in a printed publication in this or a foreign country or in public use or on sale in this country, more than one year prior to the date of application for patent in the United States.

5. Claims 1-4,6 are rejected under 35 U.S.C. 102(b) as being clearly anticipated by Kester et al 5,794,472. Kester et al teach all of the elements recited in the

aforementioned claims as shown in Figure 2 including the drive tube 60, driven tube 62, rotatable sleeve 72 and axially sliding component 74 with guide means thereon, pin means 78, and sideways component 76.

Allowable Subject Matter

6. Claim 5 is objected to as being dependent upon a rejected base claim, but would be allowable if rewritten in independent form including all of the limitations of the base claim and any intervening claims.

Conclusion

7. The prior art made of record and not relied upon is considered pertinent to applicant's disclosure. Note, especially, the patent to Yao 6,105,407, embodiment of Fig.6; also Hu '894 and Shen '926.
